About This Game

[Timid yet brave, bashful yet bold... There's no logic to matters of the heart]

Nora Handa lives with Shachi Yuuri, a girl his mom adopted when they were little kids. Since Nora's mom's passing, these two students have lived alone, getting by with a little help from their friends and neighbors. And luckily for Nora, Shachi turned out to be a pretty mean cook.

Nora's academy life isn't so bad either. He's got a great posse of friends, including the seemingly wild but bubbly Yuuki Asuhara, always on hand to give advice, and Michi Kuroki, his old childhood friend, now an honor student and academy monitor.

One day, walking through the park on his way to academy, Nora bumps into a girl called Patricia. She is in fact a Princess of the Netherworld, the place where souls go after shuffling off this mortal coil, and is here in our world on an urgent mission.

To grant death to all living things.

Or so she says, before collapsing on the ground. Surrounded by all the living things on the surface, it's more than her Netherworldian being can bear. Nora, kind soul that he is, helps her recover.

If you were confused while learning how to play the game, in this version you should be able to play with no problem (we hope!). The update will coincide with the release of the [HELL MODE](#) DLC (free for owners of TAROTICA) which I have been working on for a while, so please wait a little bit longer !. **Patch notes 6 Jan 2019:**

Added most of the functionality for our quest and journal system, but there are no quests or journal entries in the game yet.

Added a little more code to try to catch that camera-crash bug.. **Magic Potion Destroyer Joins the Holiday Sales!:**

The holiday sales have kicked off on Steam, and we have added Magic Potion Destroyer to the festive activities!

Escape from the witch's mansion! This is a strategic escape game. Use "Mana Reinforcement" and "Magic Potions" to power Claudia up and make your way through the 30 stages of the witch's mansion to escape to freedom. Will you be able to make it out of the mansion safely and achieve the best ending?!

This week's [development journal](#)[ageofwonders.com] gives you an update from the tech team. First we have the status of the Mac/Linux port followed by the latest on the integration of Steamworks allowing easier user content sharing, and Cloud Saves.
